	Page
Part 1 — Overview of clinical governance	1-1
1 — Clinical governance — the concept	1-3
Purposes	1-3
Why clinical governance	1-3
The evolution to accountability for patient care quality and safety	1-4
The concept of clinical governance	1-5
Standards relating to clinical governance	1-9
Proposed new standards	1-13
Evidence on organizational factors associated with quality improvement	1-27
Assessing your organization's clinical governance progress	1-29
References	1-35
Part 2 — Understanding clinical governance components	2-1
2 — Quality improvement	2-3
Purposes	2-3
The quality improvement process	2-3
Stages in team development	2-7
Team requirements	2-8
Quality improvement techniques and tools	2-8
Agreeing on a quality improvement	2-9
Testing commitment	2-10
Establishing the baseline	2-10
<i>Analysing processes and relationships</i>	2-11
<i>Finding evidence of how things work elsewhere</i>	2-11
<i>Using quantitative techniques</i>	2-12
<i>Using qualitative techniques</i>	2-13
Analysing practice and acting to make improvements	2-13
<i>Solving problems</i>	2-13
<i>Planning action</i>	2-14
Measuring again	2-15
Assessing your interest and readiness to support quality improvement	2-16
How to use consensus-building techniques for quality improvement	2-18
<i>Brainstorming</i>	2-18
<i>Nominal group process</i>	2-20
<i>Delphi process</i>	2-23
<i>Multivoting</i>	2-25

Using consensus-building techniques	2-28
How to test commitment	2-29
<i>Force field analysis</i>	2-30
<i>Readiness for change rating</i>	2-32
Using a testing commitment technique	2-35
How to find the root cause of a problem	2-36
<i>Fishbone (cause-and-effect) diagramming</i>	2-36
<i>Asking why five times</i>	2-39
Finding the cause of a problem	2-40
Strategy, structure, culture and technical support	2-43
<i>Strategy</i>	2-43
<i>Structures and systems</i>	2-46
<i>Culture</i>	2-47
<i>Technical support</i>	2-47
References	2-49

3 — Clinical audit **3-1**

Purposes	3-1
Why do clinical audit	3-1
Clinical audit defined	3-2
The clinical audit process	3-2
Rapid-cycle approach to clinical audit	3-5
Clinical survey versus clinical audit	3-6
Clinical audit and research	3-7
Expectations for clinical audit	3-9
How to select priorities for a clinical audit programme	3-10
Using a quality impact analysis	3-14
How to design a clinical audit	3-18
Using a clinical audit as part of a quality improvement project	3-18
How to develop a clinical audit objective	3-19
How to consider stakeholders	3-21
How to think about the number of cases to include and how they will be selected	3-21
How to decide on a population or a sample	3-21
How to select a sampling technique	3-23
How to decide on sample size	3-25
How to decide on a data collection strategy	3-29
Designing a clinical audit	3-30
Clinical audit measure defined	3-32
How to draw up a clinical audit measure	3-32
How to convert a clinical audit objective to a clinical audit measure	3-34
How to define a standard	3-35
Templates for clinical audit measures	3-36
<i>For audits on access (measured in time)</i>	3-37
<i>For audits on appropriateness</i>	3-38
<i>For audits on effectiveness</i>	3-39
<i>For audits on efficiency</i>	3-40

<i>For audits on acceptability (patient and carer experience)</i>	3-41
<i>For audits on efficacy (benefits or outcomes)</i>	3-42
Types of clinical audit measures	3-43
How to evaluate a clinical audit design and measures	3-43
Evaluating clinical audit designs and measures using SAMBA	3-44
Developing measures for a clinical audit	3-53
What data collection involves	3-56
How to screen cases	3-56
How to collate preliminary findings	3-57
How to calculate preliminary compliance	3-57
The importance of careful review of preliminary findings of a clinical audit	3-58
What's involved in review of preliminary findings	3-59
How to review individual cases	3-59
How to calculate final compliance	3-60
How to display and analyse variation in clinical audit findings	3-60
Types of variation	3-62
Common cause variation	3-63
Special cause variation	3-64
How to determine the type of variation	3-65
How to act on variation	3-68
Analysing run charts to identify special cause variation	3-69
How to identify problems and their causes and act	3-75
Problems and causes	3-75
How to identify changes needed to achieve improvement	3-76
How to plan action	3-76
How to plan repeat measurement	3-77
How to carry out follow up	3-78
Strategy, structure, culture and technical support	3-79
<i>Strategy</i>	3-80
<i>Structures and systems</i>	3-81
<i>Culture</i>	3-82
<i>Technical support</i>	3-83
References	3-84

4 — Evidence-based practice 4-1

Purposes	4-1
The background to evidence-based practice	4-1
Evidence-based practice	4-3
The clinical effectiveness process	4-4
Why do critical appraisal	4-6
Critical appraisal	4-6
Key terms in critical appraisal	4-8
Randomized controlled trials	4-9
How to critically appraise a research study	4-10
How to critically appraise the findings in a research study	4-12
Appraising a design and findings of a research study	4-12
Scoring the quality of research	4-16
Risk of harm or benefit	4-17

Formulas	4-18
Using calculations to decide on clinically effective practice	4-22
Systematic reviews	4-24
Meta-analysis	4-25
How to critically appraise systematic reviews and meta-analyses	4-28
Critically appraising a systematic review or meta-analysis	4-29
Grading evidence	4-30
Clinical considerations	4-31
Standards relating to clinical effectiveness	4-31
Strategy, structure, culture and technical support	4-33
<i>Strategy</i>	4-33
<i>Structures and systems</i>	4-34
<i>Culture</i>	4-35
<i>Technical support</i>	4-36
References	4-37

5 — Clinical risk management **5-1**

Purposes	5-1
The significance of the problem	5-1
The incidence of adverse events in clinical practice	5-2
Medication errors	5-5
Risk management processes	5-7
Assessing the effectiveness of current reporting and analysis systems	5-10
The role of risk assessment	5-12
Risk assessment defined	5-12
Identifying risks	5-13
<i>Incident reporting</i>	5-14
<i>Observation</i>	5-14
<i>Screening data sources</i>	5-15
Types of events or situations to identify	5-17
Identifying hazards, events, situations or other potential risks	5-22
The risk assessment process	5-23
<i>Determining consequence</i>	5-24
<i>Determining likelihood</i>	5-26
<i>Judging significance</i>	5-26
Assessing the risk of identified hazards, events or situations	5-27
How to evaluate the risks	5-29
<i>Action and accountability for significant risks</i>	5-29
How to document the risks	5-30
Purpose of analysing clinical risks and adverse events	5-32
Types of failures and errors	5-32
<i>Types of failures</i>	5-33
<i>Types of errors</i>	5-34
Benefits of using root cause analysis	5-36
Root cause analysis terms	5-37
Root cause analysis steps	5-38
<i>Establishing the facts</i>	5-40
<i>Preserving the data</i>	5-40

<i>Mapping the process</i>	5-41
Analysing an adverse or risk-related event	5-45
<i>Finding the root cause and contributing factors</i>	5-49
Identifying the root causes and contributory factors of an adverse or risk-related event	5-53
<i>Planning action</i>	5-58
What has to change	5-59
<i>Confirm the improvement</i>	5-59
<i>Identify the types of changes</i>	5-60
Getting ready for change	5-61
Change strategies	5-62
Making an action plan for an adverse event or risk-related event	5-65
Purposes and approaches to monitoring clinical risks and adverse events	5-66
Shortcomings of root cause analysis	5-66
FMEA	5-67
Carrying out an FMEA	5-70
Standards relating to patient safety	5-73
Strategy, structure, culture and technical support for clinical risk management	5-74
<i>Strategy</i>	5-75
<i>Structures and systems</i>	5-76
<i>Culture</i>	5-77
<i>Technical support</i>	5-78
References	5-79

6 — Patient and public involvement **6-1**

Purposes	6-1
Why 'patient involvement'	6-1
Patient and public involvement	6-2
Systems for patient involvement	6-3
Systems for public involvement	6-4
Involving patients in quality improvement	6-6
Involving patients in clinical audit	6-7
Mechanisms in the NHS to enable patient and public involvement	6-8
Standards relating to patient focus	6-10
Assessing patient and public involvement systems	6-13
Strategy, structure, culture and technical support	6-14
References	6-18

7 — Appraisal and continuing development of staff competence **7-1**

Purposes	7-1
The role of appraisal and continuing development in clinical governance	7-1
Key principles of appraisal and development planning	7-2
Roles	7-4
Standards, indicators or criteria for assessing performance	7-4
<i>Competences</i>	7-5
<i>Occupational standards</i>	7-6
<i>Local performance indicators</i>	7-9

Performance profile	7-10
The appraisal process	7-11
Pitfalls in traditional approaches to performance appraisal	7-11
Standards relating to staff competence	7-12
Strategy, structure, culture and technical support	7-14
<i>Strategy</i>	7-14
<i>Structures and systems</i>	7-15
<i>Culture</i>	7-16
<i>Technical support</i>	7-16
References	7-17

Part 3 — Understanding the clinical governance system **8-1**

8 — Organizational strategy, structure and systems needed for clinical governance **8-3**

Purposes	8-3
The strategy and structural issues	8-3
A quality and safety strategy	8-4
A quality and safety structure	8-5
Dissemination and reporting systems	8-7
Options for disseminating good practice	8-8
The importance of good reporting systems	8-8
Types of reports	8-9
Specifications for reports	8-10
Guidelines for selecting types of reports	8-10
Contents for a report on an individual clinical audit	8-11
Contents for a summary report on clinical audit	8-13
Policies and procedures	8-16
<i>Ethics review of a clinical audit or quality improvement project proposal</i>	8-16
<i>Oversight of clinical audit or quality improvement projects</i>	8-18
<i>Confidentiality</i>	8-19
<i>Security</i>	8-20
<i>Documentation</i>	8-21
<i>Student or trainee projects</i>	8-21
Applying best practices	8-23
References	8-24

9 — Organizational culture and leadership needed for clinical governance **9-1**

Purposes	9-1
Evidence on assessing an organization's culture	9-1
<i>Clinical governance climate questionnaire</i>	9-4
<i>Competing values framework</i>	9-5
<i>Organizational culture inventory</i>	9-6
<i>Organization ideology questionnaire</i>	9-6
<i>Hospital culture questionnaire</i>	9-7
Techniques and key findings	9-7
Theories on changing organizational culture	9-8

Patient safety 'culture'	9-9
The organizational culture issues	9-10
Evidence on leadership for quality and safety improvement	9-11
Best practices	9-14
Applying best practices	9-21
References	9-22
10 — Acting to improve clinical governance components or systems	10-1
Purposes	10-1
How to plan the further implementation of clinical governance using a tree diagram	10-1
Using a tree diagram to plan a clinical governance-related outcome	10-4
How to identify the critical points, products and people	10-6
<i>Critical points</i>	10-6
<i>Products and time frames</i>	10-6
<i>Matching the team and the resources to the work</i>	10-8
<i>Communicating about the work programme</i>	10-9
Identifying the critical points and milestones and making the matches	10-10
Acknowledgments	10-11
