<b>Part 1 — Quality improvement and accountability</b>	<b>1-1</b>
<b>1 — Quality improvement and accountability</b>	<b>1-3</b>
Purposes	1-3
Evidence on organizational factors associated with quality improvement	1-3
The issues	1-7
Evidence on leadership for quality and safety improvement	1-8
Best practices	1-14
The concept of corporate accountability for patient care	1-21
Linking quality improvement to accountability	1-23
Assessing your organization’s strategy, structure, culture and technical support for quality improvement	1-26
References	1-31
<b>2 — The quality improvement process and the roles of quality improvement teams and facilitators</b>	<b>2-1</b>
Purposes	2-1
The quality improvement process	2-1
The A-TEAM approach to quality improvement	2-2
The importance of teams	2-5
Getting ready for quality improvement teams	2-7
The importance of facilitation	2-9
The issue	2-9
The role	2-10
The competences	2-11
Getting ready	2-13
Involving patients in quality improvement	2-15
How this course works	2-16
References	2-18
<b>Part 2 — Deciding to improve the quality of something and checking out if it’s going to be worth doing</b>	<b>3-1</b>
<b>3 — How to agree on a quality improvement</b>	<b>3-3</b>
Purposes	3-3
The end-point and the start-point	3-3
Stages in team development	3-4
Team requirements	3-6
Agreeing on a quality improvement	3-6

How to use consensus-building techniques for quality improvement	3-7
Brainstorming	3-8
Nominal group process	3-10
Using the nominal group process	3-13
Delphi process	3-15
Using the delphi process	3-17
Multivoting	3-19
Using multivoting	3-21
Quality impact analysis	3-22
Affinity diagram	3-24
Using an affinity diagram	3-28
How to develop a quality improvement objective	3-30
<i>Model for objectives</i>	3-30
<i>Selecting a verb</i>	3-31
<i>Defining quality</i>	3-31
<i>Clarifying the subject</i>	3-32
<i>Formulating the improvement objective</i>	3-33
Identifying features of quality for improvement	3-34
How to consider stakeholders	3-34
Using consensus-building techniques	3-36
Using a quality impact analysis	3-37
Using an affinity diagram for a quality improvement subject	3-39
Formulating the objective for a quality improvement subject	3-40
Identifying the stakeholders and planning their involvement	3-40
References	3-41
<b>4 — How to test commitment to quality improvement</b>	<b>4-1</b>
Purposes	4-1
What's commitment	4-1
Helping a team to test commitment	4-2
Force field analysis	4-3
Readiness for change rating	4-5
Testing commitment	4-8
References	4-9
<b>Part 3 — Finding out what's happening now</b>	<b>5-1</b>
<b>5 — How to establish the baseline</b>	<b>5-3</b>
Purposes	5-3
The importance	5-3
The baseline	5-4
<i>Analysing processes and relationships</i>	5-4
<i>Finding evidence of how things work elsewhere</i>	5-5
<i>Using quantitative techniques</i>	5-6
<i>Using qualitative techniques</i>	5-7
Evaluating available information	5-7
Technical notes on quality-of-care measures	5-7
<i>How to test the validity of a quality-of-care measure</i>	5-9

<i>How to test the sensitivity and specificity of a quality-of-care measure</i>	5-12
The importance of data quality to quality and safety improvement	5-13
What data quality means	5-13
What's involved in achieving data quality for quality improvement	5-14
<i>How to test reliability of data collection using quality-of-care measures</i>	5-16
Notes on scientifically acceptable evidence	5-17
Establishing a baseline	5-18
References	5-21

## **6 — How to describe processes and relationships** **6-1**

Purposes	6-1
The usefulness of techniques to describe the current process	6-1
What process mapping is about	6-2
What a process includes	6-2
Key concepts in processes	6-4
Cycle time	6-4
Continuous process flow	6-5
What a process map is	6-6
Top-down process map	6-7
Detailed process map	6-8
<i>Symbols for detailed process mapping</i>	6-9
Work-flow or process layout map	6-11
Cross-functional process map	6-11
Deciding on the process mapping technique to use	6-14
Using process maps	6-16
Tree diagram	6-18
Using tree diagrams	6-21
Using techniques to describe processes and relationships	6-23
References	6-25

## **7 — How to critically appraise evidence** **7-1**

Purposes	7-1
Critical appraisal	7-1
Key terms in critical appraisal	7-3
Randomized controlled trials	7-4
How to critically appraise a research study	7-5
Critically appraising a research design and findings	7-6
Risk of harm or benefit	7-10
Formulas	7-10
Using calculations to decide on clinically effective practice	7-14
Systematic reviews	7-15
The importance of the search strategy and inclusion criteria	7-16
Meta-analysis	7-17
How to critically appraise a systematic review or meta-analysis	7-20
Critically appraising a systematic review or meta-analysis	7-22
Clinical considerations	7-23
Using critical appraisal of evidence	7-24
References	7-25

<b>8 — How to use benchmarking</b>	<b>8-1</b>
Purposes	8-1
The benefits	8-1
Benchmarking	8-2
Types of benchmarking	8-2
Benchmarking vs benchmarks	8-3
The benchmarking process	8-4
Sources for benchmarking	8-7
Ethical and contractual considerations	8-7
Using benchmarking	8-10
References	8-12
<b>9 — How to use qualitative techniques</b>	<b>9-1</b>
Purposes	9-1
The role of qualitative techniques	9-1
Focus groups	9-2
How to plan the focus group	9-4
How to carry out the focus group	9-11
How to analyse and report findings of the focus group	9-12
Using a focus group	9-14
Critical incident (key event) technique	9-17
Using the critical incident (key event) technique	9-18
Patient stories	9-20
Using discovery interviews	9-22
Consent for participation in qualitative techniques	9-23
Using qualitative techniques	9-23
References	9-26
<b>10 — How to summarize and present data for quality improvement</b>	<b>10-1</b>
Purposes	10-1
The importance of making data useful	10-1
Helping teams to understand and interpret data	10-2
Types of data	10-3
<i>Nominal or categorical</i>	10-3
<i>Ordinal</i>	10-4
<i>Interval</i>	10-5
<i>Ratio</i>	10-6
Identifying types of data	10-7
How to organize and present data	10-8
<i>Table</i>	10-8
<i>Bar chart</i>	10-9
<i>Pareto chart</i>	10-10
<i>Pie chart or pie diagram</i>	10-11
<i>Histogram</i>	10-12
<i>Frequency polygon</i>	10-13
<i>Cumulative frequency polygon</i>	10-14
<i>Box and whisker diagram</i>	10-15
<i>Scattergram</i>	10-17

<i>Funnel plot</i>	10-18
How to present tables, charts and graphic displays	10-19
How to summarize data	10-21
How to show central tendency	10-21
Using measures of central tendency	10-22
How to show dispersion	10-23
The normal distribution	10-24
How to use calculation rules	10-26
Inferential statistics	10-27
How to use inferential statistics to estimate values in a population	10-28
How to use inferential statistics to test significance	10-32
Signs, symbols and abbreviations used in statistics	10-40
Inferential statistics in quality improvement	10-40
Using statistical techniques	10-41
References	10-42

## **11 — How to use surveys 11-1**

Purposes	11-1
The benefits of surveys	11-1
How to think about the number of cases to include in a survey and how they will be selected	11-2
How many cases should be included	11-2
How to decide on a population or sample	11-3
How to select a sampling technique	11-5
<i>Representative sampling techniques</i>	11-7
<i>Non-representative sampling techniques</i>	11-8
How to decide on sample size	11-10
Data collection methods	11-13
Questionnaires	11-13
Types of questions	11-14
Rating scales	11-15
<i>Numerical rating scale</i>	11-15
<i>Semantic differential rating scale</i>	11-16
<i>Likert rating scale</i>	11-17
How to develop a questionnaire	11-17
Pitfalls in questionnaire design	11-19
Using surveys	11-20
Analysing a questionnaire	11-22
Using a survey	11-26
References	11-28

## **12 — How to use clinical audit 12-1**

Purposes	12-1
Clinical audit defined	12-1
The clinical audit process	12-2
How to design a clinical audit	12-4
How to use a clinical audit as part of a QI project	12-4
How to develop a clinical audit objective	12-5

How to decide on a population or a sample – and time period	12-6
How to decide on a data collection strategy	12-7
Clinical audit measure defined	12-8
How to draw up a clinical audit measure	12-8
How to convert a clinical audit objective to a clinical audit measure	12-10
How to define a standard	12-11
Templates for clinical audit measures	12-12
<i>For audits on access</i>	12-13
<i>For audits on appropriateness</i>	12-14
<i>For audits on effectiveness</i>	12-15
<i>For audits on efficiency</i>	12-16
<i>For audits on acceptability</i>	12-17
<i>For audits on efficacy (benefits or outcomes)</i>	12-18
Types of clinical audit measures	12-18
What data collection involves	12-19
How to screen cases	12-20
How to collate preliminary clinical audit findings	12-21
How to calculate preliminary compliance	12-21
The importance of careful review of preliminary findings of a clinical audit	12-21
What's involved in reviewing preliminary findings	12-22
How to review individual cases	12-22
How to calculate final compliance	12-23
How to identify problems and their causes and act	12-24
Evaluating clinical audit designs and measures	12-25
Designing a clinical audit	12-32
References	12-37
<b>13 — How to cost quality</b>	<b>13-1</b>
Purposes	13-1
The importance	13-1
Models for costing quality	13-2
When to cost quality	13-5
How to cost quality for a quality improvement project	13-6
Calculating costs	13-10
Costing quality	13-11
References	13-12
<b>14 — How to use statistical process control techniques</b>	<b>14-1</b>
Purposes	14-1
Statistical process control techniques	14-1
Statistical process control thinking	14-2
Types of causes of variation	14-2
<i>Common cause variation</i>	14-3
<i>Special cause variation</i>	14-4
How to act on variation	14-5
Evaluating actions taken to achieve improvements	14-6
How to use a run chart	14-8

How to determine the type of variation	14-9
Analysing run charts to identify special cause variation	14-12
Control chart	14-19
Types of control charts	14-20
Interpretation of control charts	14-22
Deciding on which control chart to use	14-22
Using run charts and control charts	14-24
References	14-25

**Part 4 — Analysing problems and acting to achieve improvements 15-1**

**15 — How to analyse problems 15-3**

Purposes	15-3
The importance of taking time to analyse problems	15-3
Problems and causes	15-4
Pattern analysis	15-5
How to state a problem	15-6
Writing a problem statement	15-7
How to find the root cause of a problem	15-8
Fishbone (cause-and-effect) diagramming	15-8
Using fishbone diagramming	15-10
Asking why five times	15-12
Using asking five whys	15-13
Causes of problems	15-14
Using problem-solving tools	15-15
References	15-18

**16 — How to plan change to achieve improvement 16-1**

Purposes	16-1
The importance	16-1
Making changes that work	16-2
What works to achieve change	16-2
What has to change	16-3
<i>Confirm the improvement</i>	16-3
<i>Express the improvement</i>	16-3
<i>Identify the types of changes</i>	16-5
Getting ready for change	16-6
Change strategies	16-8
<i>Redesigning current practice</i>	16-9
Action planning	16-10
Process decision programme charting	16-11
Planning to achieve an improvement	16-15
Planning and managing change	16-19
References	16-20

<b>Part 5 — Keeping it going</b>	<b>17-1</b>
<b>17 — How to measure again and follow up</b>	<b>17-3</b>
Purposes	17-3
Measuring the impact of actions	17-3
How to plan measuring again	17-4
Repeat measurement strategies	17-6
How to carry out follow up	17-8
Planning measuring again	17-9
Measuring again	17-11
References	17-12
<b>18 — How to manage a quality improvement project</b>	<b>18-1</b>
Purposes	18-1
The principles	18-1
The processes of project management	18-3
The role of the project manager	18-4
The role of the quality improvement facilitator	18-5
Project scheduling	18-5
<i>Action plan table</i>	18-6
<i>Gantt chart</i>	18-7
<i>PERT chart</i>	18-11
<i>Critical path method</i>	18-13
Planning and managing a project	18-14
References	18-19
<b>Part 6 — Quality improvement resources</b>	<b>19-1</b>
<b>19 — Theoretical bases for quality improvement</b>	<b>19-3</b>
Purposes	19-3
Theorists and theories	19-3
<i>Juran</i>	19-3
<i>Deming</i>	19-5
<i>Shewhart</i>	19-9
<i>Crosby</i>	19-10
<i>Ishikawa</i>	19-13
Quality approaches	19-13
<i>Quality assurance (QA)</i>	19-13
<i>Quality control (QC)</i>	19-14
<i>Quality management (QM)</i>	19-14
<i>Total quality management (TQM)</i>	19-15
<i>Continuous quality improvement (CQI)</i>	19-16
<i>QA vs CQI</i>	19-16
<i>Reengineering</i>	19-17
CQI vs reengineering	19-18
<i>Lean thinking</i>	19-18
Application of theoretical bases to the healthcare system	19-19
Using the theoretical approaches	19-20
References	19-23

<b>20 — Techniques for quality improvement projects</b>	<b>20-1</b>
Purpose	20-1
Quality improvement project phases	20-1
Summary chart of QI tools and techniques	20-5
Reference summary of tools and techniques	20-7
Action plan table	20-8
Affinity diagram	20-9
Asking why five times	20-10
Benchmarking	20-11
Brainstorming	20-12
Clinical audit	20-13
Control chart	20-14
Costing quality	20-15
Critical appraisal of evidence	20-16
Critical incident (key event)	20-17
Delphi process	20-18
Discovery interview	20-19
Fishbone (cause-and-effect) diagramming	20-20
Focus group	20-21
Force field analysis	20-22
Gantt chart	20-23
Multivoting	20-24
Nominal group process	20-25
Process decision programme chart	20-26
Process map – Cross-functional	20-27
Process map – Detailed	20-28
Process map – Top down	20-29
Process map – Work-flow or process layout	20-30
Programme Evaluation and Review Technique (PERT)	20-31
Quality impact analysis	20-32
Readiness for change rating	20-33
Run chart	20-34
Statistics – Descriptive and inferential	20-35
Survey	20-36
Tree diagram	20-37
Reference summary of quality measurement-related methods	20-38
