<b>1 — How to describe the clinical audit process</b>	<b>1-1</b>
Purposes	1-1
Why do clinical audit	1-1
Clinical audit defined	1-2
The clinical audit process	1-2
Rapid-cycle approach to clinical audit	1-5
Clinical survey versus clinical audit	1-6
Clinical audit and research	1-7
The clinical effectiveness process	1-9
The quality improvement process	1-14
Risk management processes	1-17
An accountability framework	1-20
Identifying the processes in practice	1-22
Key organizational roles	1-28
Roles and major duties for clinical audit staff	1-28
Reflecting on the roles	1-31
Putting it all together	1-32
References	1-33
<b>2 — How to develop a clinical audit programme</b>	<b>2-1</b>
Purposes	2-1
The importance of doing clinical audit effectively	2-1
Making sure a proposed clinical audit is really a clinical audit	2-2
Clarifying purposes of proposed audits	2-2
Expectations for clinical audit	2-8
How to select priorities for a clinical audit programme	2-8
Brainstorming	2-9
Nominal group process	2-11
Delphi process	2-14
Using a consensus-building technique	2-17
Criteria for selecting subjects for clinical audit	2-18
Quality impact analysis	2-19
Using a quality impact analysis	2-22
References	2-26

<b>3 — How to design a clinical audit</b>	<b>3-1</b>
Purposes	3-1
How to design a clinical audit	3-1
How to develop a clinical audit objective	3-2
<i>Selecting a verb</i>	3-3
<i>Defining quality</i>	3-5
<i>Clarifying the subject</i>	3-6
<i>Formulating the clinical audit objective statement</i>	3-6
Developing objectives for clinical audits	3-8
Developing a clinical audit objective	3-13
How to title a clinical audit	3-14
How to consider stakeholders	3-14
How to think about the number of cases to include and how they will be selected	3-15
How many cases should be included	3-16
How to decide on a population or a sample	3-17
How to select a sampling technique	3-20
<i>Representative sampling techniques</i>	3-22
<i>Non-representative sampling techniques</i>	3-23
How to decide on sample size	3-25
How to decide on a data collection strategy	3-28
How to test a clinical audit design	3-31
Completing designs for clinical audits	3-32
Designing your clinical audit	3-42
References	3-43
<b>4 — How to critically appraise evidence</b>	<b>4-1</b>
Purposes	4-1
Critical appraisal	4-1
Key terms in critical appraisal	4-2
Randomized controlled trials	4-4
How to critically appraise a research study	4-5
Critically appraising a research design and findings	4-6
Risk of harm or benefit	4-10
Formulas	4-10
Using calculations to decide on clinically effective practice	4-14
Systematic reviews	4-15
Meta-analysis	4-16
How to critically appraise a systematic review or meta-analysis	4-19
Critically appraising a systematic review or meta-analysis	4-21
Clinical considerations	4-22
References	4-23
<b>5 — How to draw up measures for a clinical audit</b>	<b>5-1</b>
Purposes	5-1
Why 'measures'	5-1
Clinical audit measure defined	5-2
How to draw up a clinical audit measure	5-4

How to convert a clinical audit objective to a clinical audit measure	5-6
How to define a standard	5-7
Templates for clinical audit measures	5-8
<i>For audits on access (measured in time)</i>	5-10
<i>For audits on appropriateness</i>	5-11
<i>For audits on effectiveness</i>	5-12
<i>For audits on efficiency</i>	5-13
<i>For audits on acceptability (patient and carer experience)</i>	5-14
<i>For audits on efficacy (benefits or outcomes)</i>	5-15
Approaches to measures	5-16
Outcome versus process measures	5-17
Types of clinical audit measures	5-18
How to define the denominator and the numerator	5-18
Exclusions versus exceptions for individual clinical audit measures	5-22
Drawing up measures for clinical audits	5-25
How to measure a complication	5-37
Characteristics of a clinical audit measure	5-39
<i>How to test the validity of a clinical audit measure</i>	5-41
How to assess clinical audit measures	5-42
How to evaluate a clinical audit design and measures	5-44
Evaluating clinical audit designs and measures using SAMBA	5-45
How to convert evidence into clinical audit measures	5-54
Designing a clinical audit and developing clinical audit measures for a clinical guideline	5-57
Developing measures for your clinical audit	5-59
References	5-62

## **6 — How to develop a data collection protocol for a clinical audit** **6-1**

Purpose	6-1
The importance of structuring data collection	6-1
Considerations for structured data collection	6-1
Data protection protocol	6-2
Data sources for data collection	6-3
Data collectors	6-4
<i>How to test the reliability of data collection</i>	6-5
Case selection	6-7
<i>Identifying the population</i>	6-7
<i>Selecting the sample</i>	6-7
<i>Representative sample</i>	6-7
<i>Non-representative sample</i>	6-10
Data collection tools	6-10
Timing of data collection	6-14
Data protection and control	6-14
Data protection law	6-16
Assessing a data collection protocol	6-20
How to do a pilot test of a clinical audit	6-22
Outlining a data collection protocol for a clinical audit	6-23
References	6-25

<b>7 — How to collect and collate data for a clinical audit</b>	<b>7-1</b>
Purposes	7-1
The importance of accurate data collection	7-1
What data collection involves	7-2
How to screen cases	7-2
How to document decisions and observations	7-4
<i>Clinical Audit Data Matrix</i>	7-6
<i>Clinical Audit Case Abstract</i>	7-7
Guides for screening cases	7-12
Screening data sources using clinical audit measures	7-20
How to summarize data using the Clinical Audit Data Matrix	7-22
Collating the data	7-22
How to summarize qualitative data	7-24
<b>8 — How to report compliance and analyse variation</b>	<b>8-1</b>
Purposes	8-1
How to collate preliminary clinical audit findings	8-1
How to calculate preliminary compliance	8-2
How to calculate preliminary compliance for a complication measure	8-5
Calculating preliminary compliance with clinical audit measures	8-7
The importance of careful review of preliminary findings of a clinical audit	8-8
What's involved in reviewing preliminary findings	8-8
Sensitivity and specificity	8-9
<i>How to test the sensitivity and specificity of a clinical audit measure</i>	8-9
How to review individual cases	8-10
How to carry out review of preliminary clinical audit findings	8-11
How to adjust clinical audit findings	8-12
How to calculate final compliance	8-13
How to calculate final compliance for a complication measure	8-14
What the preliminary review of clinical audit findings achieves	8-15
How to carry out review of final clinical audit findings	8-17
How to display and analyse variation in clinical audit findings	8-17
Types of variation	8-20
<i>Common cause variation</i>	8-20
<i>Special cause variation</i>	8-21
How to determine the type of variation	8-22
How to act on variation	8-25
Analysing run charts to identify special cause variation	8-26
How to present the findings of a clinical audit	8-32
Planning to present the findings of a clinical audit	8-34
References	8-36
<b>9 — How to summarize and present data for a clinical audit</b>	<b>9-1</b>
Purpose	9-1
The importance of making data useful	9-1
Helping a clinician or a team understand and interpret data	9-2
Types of data	9-3
<i>Nominal or categorical</i>	9-3

<i>Ordinal</i>	9-4
<i>Interval</i>	9-5
<i>Ratio</i>	9-6
Identifying types of data	9-7
How to organize and present data	9-8
<i>Table</i>	9-8
<i>Bar chart</i>	9-9
<i>Pareto chart</i>	9-10
<i>Pie chart or pie diagram</i>	9-11
<i>Histogram</i>	9-12
<i>Frequency polygon</i>	9-13
<i>Cumulative frequency polygon</i>	9-14
<i>Box and whisker diagram</i>	9-15
<i>Scattergram</i>	9-17
<i>Funnel plot</i>	9-18
How to present tables, charts and graphic displays	9-19
How to summarize data	9-20
How to show central tendency	9-21
Using measures of central tendency	9-22
How to show dispersion	9-22
The normal distribution	9-23
How to use calculation rules	9-25
Inferential statistics	9-26
How to use inferential statistics to estimate values in a population	9-27
How to use inferential statistics to test significance	9-31
Signs, symbols and abbreviations used in statistics	9-39
Inferential statistics in clinical audit	9-39
Deciding how to summarize and present data for your clinical audit	9-40
References	9-41

## **10 — How to analyse problems for a clinical audit 10-1**

Purposes	10-1
The importance of taking time to analyse problems	10-1
How to focus on improvement	10-2
Problems and causes	10-3
Pattern analysis	10-3
How to state a problem	10-4
Writing a problem statement	10-5
How to find the root cause of a problem	10-6
<i>Fishbone (cause-and-effect) diagramming</i>	10-6
<i>Asking why five times</i>	10-9
<i>Process mapping</i>	10-10
Causes of problems	10-15
Finding the causes of a problem	10-16
References	10-20

## **11 — How to plan change to achieve improvement 11-1**

Purpose	11-1
Making changes that work	11-1

What works to achieve change	11-2
The I-M-P-R-O-V-E-S model	11-2
Identifying the improvement	11-3
<i>Express the improvement</i>	11-4
<i>Identify the types of changes</i>	11-5
Moulding (or mobilizing) opinion	11-8
Preparing a strategy for change	11-9
Redesigning current practice	11-11
Operating the new way	11-12
Verifying that the new way works	11-14
Eliminating unwanted variation	11-15
Stabilizing change	11-15
Planning to achieve an improvement	11-16
References	11-24
<b>12 — How to measure again and follow up for a clinical audit</b>	<b>12-1</b>
Purposes	12-1
Measuring the impact of actions	12-1
Continuing the clinical audit process	12-2
How to plan repeat measurement	12-3
Repeat data collection strategies	12-4
Planning measuring again	12-8
How to carry out follow up	12-10
Measuring again and following up	12-11
References	12-12
<b>13 — How to prepare clinical audit reports</b>	<b>13-1</b>
Purposes	13-1
The importance of clinical audit reports	13-1
Purposes for reports	13-2
Types of reports	13-2
Guidance and principles for clinical audit-related reports	13-3
Contents for a clinical audit report	13-4
Preparing clinical audit reports	13-13
Contents for a summary report on clinical audit	13-14
Reporting on clinical audit progress	13-17
<b>14 — How to handle ethics issues in clinical audit</b>	<b>14-1</b>
Purposes	14-1
Identifying ethics issues in clinical audit	14-1
What ethics involves	14-2
Applying the principles to the issues	14-4
Ethics issues related to clinical audit	14-6
Analysis of the issues for clinical audit	14-8
When a clinical audit or QI project should be subject to ethics review	14-9
How a clinical audit or QI programme should be subject to ethical oversight	14-11
Examples of policies and procedures	14-11

<i>Confidentiality</i>	14-11
<i>Security</i>	14-13
<i>Documentation</i>	14-13
<i>Student or trainee projects</i>	14-14
Resolving ethics issues in clinical audit	14-15
Clarifying accountability	14-16
Adopting a code of ethics for clinical audit	14-17
References	14-18

## **15 — How to influence good practice in clinical audit** **15-1**

Purposes	15-1
The importance of organizational support for clinical audit	15-1
Strategy, structure, culture and technical support	15-4
<i>Strategy</i>	15-4
<i>Structures and systems</i>	15-5
<i>Culture</i>	15-6
<i>Technical support</i>	15-6
Assessing your organization's strategy, structure, culture and technical support for clinical audit	15-7
How to plan the way forward using a tree diagram	15-13
Using a tree diagram to plan the way forward	15-16
How to identify the critical points, products and people	15-17
<i>Critical points</i>	15-17
<i>Products and time frames</i>	15-17
<i>Matching the team and the resources to the work</i>	15-18
<i>Communicating about the work</i>	15-19
Identifying the critical points and milestones and making the matches	15-20
References	15-22

## **16 — Understanding the evolution of clinical audit** **16-1**

Purpose	16-1
Origins of clinical audit	16-1
Early development of clinical audit in the USA	16-2
Accreditation as a form of audit	16-4
'Scientific' development of clinical audit	16-6
<i>Case review</i>	16-6
<i>Criterion-based medical audit</i>	16-7
Refinements of the clinical audit process	16-9
<i>Indicator-based audit</i>	16-10
<i>Occurrence screening</i>	16-11
The development of medical audit in the UK	16-11
<i>Descriptive, observational, or normative-based audit</i>	16-12
Clinical audit developments in the UK	16-13
The reinvigoration of clinical audit	16-15
References	16-16

## **17 — The knowledge and skills involved in clinical audit** **17-1**

<b>18 — Clinical audit forms</b>	<b>18-1</b>
The purpose of forms relating to clinical audit	18-1
The clinical audit proposal form	18-1
The clinical audit data presentation form	18-6
<b>19 — Glossary</b>	<b>19-1</b>
<b>20 — Answers</b>	<b>20-1</b>
