

Getting Clinical Audit Right to Benefit Patients

Contents	Page
Foreword	v
Acknowledgements	vii
Purpose	1
1 — The clinical audit process	2
Why do clinical audit	2
Clinical audit defined	2
The clinical audit process	3
Rapid-cycle approach to clinical audit	5
Clinical survey versus clinical audit	6
Clinical audit and research	7
Relating research and clinical audit to providing clinically effective care	9
The quality improvement process	9
Risk management processes	13
An accountability framework	16
2 — How to design a clinical audit	18
The importance of doing clinical audit effectively	18
Expectations for clinical audit	18
How to design a clinical audit	19
How to select subjects for clinical audit	20
<i>Quality impact analysis</i>	21
How to develop a clinical audit objective	23
<i>Selecting a verb</i>	24
<i>Defining quality</i>	25
<i>Formulating the clinical audit objective statement</i>	25
How to title a clinical audit	27
How to consider stakeholders	27

Contents	Page
How to think about the number of cases to include and how they will be selected	28
How many cases should be included	29
How to decide on a population or a sample	29
How to select a sampling technique	32
How to decide on sample size	34
How to decide on a data collection strategy	37
3 — How to draw up measures for a clinical audit	39
Why ‘measures’	39
Clinical audit measure defined	39
How to draw up a clinical audit measure	42
How to convert a clinical audit objective to a clinical audit measure	44
How to define a standard	45
Templates for clinical audit measures	47
<i>For audits on access (measured in time)</i>	48
<i>For audits on appropriateness</i>	49
<i>For audits on effectiveness</i>	50
<i>For audits on efficiency</i>	51
<i>For audits on acceptability (patient and carer experience)</i>	52
<i>For audits on efficacy (benefits or outcomes)</i>	53
Approaches to measures	54
Outcome versus process measures	55
Types of clinical audit measures	56
How to define the denominator and the numerator	57
Exclusions versus exceptions for individual clinical audit measures	60
How to measure a complication	62
Characteristics of a clinical audit measure	65
<i>How to test the validity of a clinical audit measure</i>	66
How to evaluate a clinical audit design and measures	69
How to convert evidence into clinical audit measures	70
4 — How to collect and collate data for a clinical audit	73
How to develop a data collection protocol	73
<i>Data sources</i>	75
<i>Data collectors</i>	75
<i>How to test the reliability of data collection</i>	75
<i>Case selection</i>	77
<i>Data collection tools</i>	81
<i>Timing of data collection</i>	84
<i>Data protection and control</i>	84

Contents

How to do a pilot test	85
What data collection involves	87
How to record data	88
How to collate preliminary clinical audit findings	91
How to calculate preliminary compliance	91
How to calculate preliminary compliance for a complication measure	95
5— How to review findings of a clinical audit	96
The importance of careful review of preliminary findings of a clinical audit	96
What's involved in reviewing preliminary findings	96
Sensitivity and specificity	97
<i>How to test the sensitivity and specificity of a clinical audit measure</i>	97
How to review individual cases	99
How to carry out review of preliminary clinical audit findings	100
How to calculate final compliance	101
How to calculate final compliance for a complication measure	102
What the preliminary review of clinical audit findings achieves	103
How to carry out review of final clinical audit findings	104
How to display and analyse variation in clinical audit findings	105
Types of variation	107
<i>Common cause variation</i>	108
<i>Special cause variation</i>	108
How to determine the type of variation	110
How to act on variation	113
How to present the findings of a clinical audit	114
6— How to identify problems and their causes	116
The importance of taking time to analyse problems	116
How to focus on improvement	117
Problems and causes	117
How to state a problem	118
How to find the root cause of a problem	119
<i>Fishbone (cause-and-effect) diagramming</i>	119
<i>Asking why five times</i>	122
<i>Process mapping</i>	123
Causes of problems	127

Contents	Page
7— How to plan change to achieve improvement and repeat measurement	129
What works to achieve change	129
The I-M-P-R-O-V-E-S model	129
Identifying the improvement	131
<i>Express the improvement</i>	131
<i>Identify the types of changes</i>	133
Moulding (or mobilizing) opinion	135
Preparing a strategy for change	137
Redesigning current practice	139
Operating the new way	140
Verifying that the new way works	142
Eliminating unwanted variation	142
Stabilizing change	143
Measuring the impact of actions	143
Continuing the clinical audit process	144
How to plan repeat measurement	144
Repeat data collection strategies	145
How to carry out follow up	146
8— Putting clinical audit in context	147
Organizational support	147
Ethics considerations	148
Glossary	149
References	161
Appendix	166
Index	167
