<b>Part 1 — Overview of clinical governance</b>	<b>1-1</b>
<b>1 — Clinical governance — the concept</b>	<b>1-3</b>
Purposes	1-3
Why clinical governance	1-3
The evolution to clinical governance	1-4
The concept of clinical governance	1-8
Clinical governance in practice	1-11
Other changes in the health system	1-13
Standards relating to clinical governance	1-15
Evidence on organizational factors associated with quality improvement	1-20
Recognition of the key factors	1-29
The clinical governance and assurance role	1-29
Preparing for learning about clinical governance	1-31
References	1-39
<b>Part 2 — Understanding clinical governance components</b>	<b>2-1</b>
<b>2 — Quality improvement</b>	<b>2-3</b>
Purposes	2-3
The quality improvement process	2-3
Approaches to quality improvement	2-5
<i>The P-D-S-A cycle in detail</i>	2-7
The A-TEAM approach to quality improvement	2-8
Stages in team development	2-12
Team requirements	2-13
Quality improvement tools	2-13
Agreeing on a quality improvement	2-14
Testing commitment	2-14
Establishing the baseline	2-15
<i>Analysing processes and relationships</i>	2-15
<i>Finding evidence of how things work elsewhere</i>	2-16
<i>Using quantitative tools</i>	2-17
<i>Using qualitative tools</i>	2-18
Analysing practice and acting to make improvements	2-18
<i>Solving problems</i>	2-18
<i>Planning action</i>	2-19

Measuring again	2-20
Assessing your interest and readiness to lead quality improvement	2-21
How to use consensus-building tools for quality improvement	2-23
<i>Brainstorming</i>	2-23
<i>Nominal group process</i>	2-25
<i>Delphi process</i>	2-27
<i>Multivoting</i>	2-30
Selecting a subject for a QIP	2-32
How to develop an objective for a QIP	2-34
<i>Model for QIP objective</i>	2-34
<i>Selecting a verb</i>	2-35
<i>Defining quality</i>	2-35
<i>Clarifying the subject</i>	2-36
<i>Formulating the improvement objective</i>	2-37
How to consider stakeholders	2-38
Formulating the objective for a QIP	2-39
Identifying the stakeholders and planning their involvement	2-40
How to test commitment	2-41
<i>Force-field analysis</i>	2-42
<i>Readiness-for-change rating</i>	2-44
Using a testing commitment tool	2-47
Establishing a baseline	2-48
Standards relating to quality improvement	2-49
The future for quality improvement	2-50
Strategy, structure, culture and technical support	2-51
<i>Strategy</i>	2-51
<i>Structures and systems</i>	2-54
<i>Culture</i>	2-55
<i>Technical support</i>	2-55
Considering the development of quality improvement	2-56
References	2-57

### **3 — Clinical audit** **3-1**

Purposes	3-1
Why do clinical audit	3-1
How to explain the clinical audit process	3-2
Rapid-cycle approach to clinical audit	3-5
Clinical survey versus clinical audit	3-6
Clinical audit and research	3-7
Expectations for clinical audit	3-9
How to design a clinical audit	3-10
How to select subjects for clinical audit	3-11
<i>Quality impact analysis</i>	3-12
Using a quality impact analysis	3-14
How to develop a clinical audit objective	3-18
How to consider stakeholders	3-20
How to select the right cases for a clinical audit	3-20
<i>Cases to be included and excluded</i>	3-21
How to decide on the number of cases to include	3-22

How to decide on a population or a sample	3-23
How to select a sampling technique	3-24
<i>Representative sampling techniques</i>	3-26
<i>Non-representative sampling techniques</i>	3-27
How to decide on sample size	3-28
How to decide on a data collection strategy	3-31
Designing a clinical audit	3-32
Why 'measures'	3-34
Clinical audit measure defined	3-34
How to draw up a clinical audit measure	3-35
How to convert a clinical audit objective to a clinical audit measure	3-37
How to define a standard	3-38
Templates for clinical audit measures	3-39
<i>For a measure on access (measured in time)</i>	3-40
<i>For a measure on appropriateness</i>	3-41
<i>For a measure on effectiveness</i>	3-42
<i>For a measure on efficiency</i>	3-43
<i>For a measure on acceptability (patient and carer experience)</i>	3-44
<i>For a measure on efficacy (benefits or outcomes)</i>	3-45
Approaches to measures	3-46
Outcome versus process measures	3-47
Types of clinical audit measures	3-48
How to evaluate a clinical audit design and measures	3-49
Evaluating clinical audit designs and measures using SAMBA	3-49
Developing measures for a clinical audit	3-59
Preparing for data collection	3-62
How to measure a complication	3-63
What data collection involves	3-65
How to collate preliminary findings and calculate preliminary compliance	3-66
The importance of careful review of preliminary findings of a clinical audit	3-70
How to review individual cases	3-70
How to calculate final compliance	3-71
What the preliminary review of clinical audit findings achieves	3-72
How to identify and act on problems and their causes	3-73
Problems and causes	3-74
<i>Fishbone (cause-and-effect) diagramming</i>	3-74
Finding the causes of a problem	3-77
How to plan and implement action	3-78
How to plan repeat measurement	3-78
Standards relating to clinical audit	3-80
Strategy, structure, culture and technical support	3-81
<i>Strategy</i>	3-81
<i>Structures and systems</i>	3-82
<i>Culture</i>	3-83
<i>Technical support</i>	3-84
Acting to support the clinical audit process	3-84
References	3-86
Appendix: How to calculate sample size for a clinical audit	3-89

## **4 — Quality assurance** **4-1**

Purposes	4-1
Quality terms and meanings	4-1
<i>Quality assurance (QA)</i>	4-1
<i>Quality control (QC)</i>	4-2
<i>Quality management (QM)</i>	4-2
<i>Total quality management (TQM)</i>	4-3
<i>QA versus QI</i>	4-4
Reflecting on your experience	4-4
What to quality assure	4-5
What QA involves	4-6
How to display and analyse practice	4-7
Types of variation	4-9
<i>Common cause variation</i>	4-9
<i>Special cause variation</i>	4-10
How to determine the type of variation	4-11
How to act on variation	4-15
Analysing run charts to identify special cause variation	4-16
How to use a checklist	4-22
Using a checklist for quality assurance	4-24
Standards relating to quality assurance	4-25
Strategy, structure, culture and technical support	4-28
<i>Strategy</i>	4-28
<i>Structures and systems</i>	4-30
<i>Culture</i>	4-30
<i>Technical support</i>	4-31
Acting to support quality assurance	4-32
References	4-33

## **5 — Evidence-based practice** **5-1**

Purposes	5-1
The background to evidence-based practice	5-1
Evidence-based practice	5-3
The clinical effectiveness process	5-4
Critical appraisal	5-6
Key terms in critical appraisal	5-8
Randomized controlled trials	5-9
How to critically appraise a research study	5-10
Critically appraising a research design and findings	5-11
Scoring the quality of research	5-15
Risk of harm or benefit	5-16
Formulas	5-17
Using calculations to decide on clinically effective practice	5-21
Systematic reviews	5-23
The importance of the search strategy and inclusion criteria	5-24
Meta-analysis	5-25
How to critically appraise a systematic review or meta-analysis	5-30
<i>Example of the importance of appraisal of a systematic review</i>	5-30

Critically appraising a systematic review or meta-analysis	5-31
Grading evidence	5-32
Clinical considerations	5-33
How to develop a clinical guideline from evidence	5-33
Developing a clinical guideline	5-36
Guidance, standards and information from NICE	5-37
Implementation of evidence-based practice	5-38
Standards relating to evidence-based practice	5-39
The future of evidence-based practice	5-39
The future for clinical effectiveness in England	5-40
Strategy, structure, culture and technical support	5-41
<i>Strategy</i>	5-42
<i>Structures and systems</i>	5-43
<i>Culture</i>	5-43
<i>Technical support</i>	5-44
Acting to support evidence-based practice	5-45
References	5-46
<b>6 — Patient experience</b>	<b>6-1</b>
Purposes	6-1
Why 'patient experience and involvement'	6-1
What matters to patients	6-2
Patient experience-related concepts	6-3
Systems for patient-centred care	6-4
How to develop patient-centred care	6-5
<i>Always Events</i>	6-6
Systems for patient engagement or involvement	6-7
Systems for public involvement	6-9
Systems for patient experience	6-10
<i>National patient experience systems</i>	6-11
<i>Patient experience systems at local organizational level</i>	6-14
How to measure the patient experience	6-14
Assessing patient involvement and experience systems	6-16
Patient complaints	6-18
Standards relating to person-centred care and patient experience	6-19
Strategy, structure, culture and technical support	6-23
Acting to support the patient experience process	6-27
References	6-28
<b>7 — Risk assessment and management</b>	<b>7-1</b>
Purposes	7-1
The role of risk assessment and risk management	7-1
Risk management processes	7-2
How to identify risks	7-7
<i>Observation</i>	7-8
<i>Screening data sources</i>	7-9
How to identify risks in clinical settings	7-9
How to analyse risks	7-12

<i>Determining consequence</i>	7-13
<i>Determining likelihood</i>	7-15
<i>Judging significance</i>	7-16
Identifying and analysing risks	7-17
Types of risk assessment	7-19
How to handle the risks	7-19
Risk owner, risk appetite and types of risk-related actions	7-20
Accountability for risks	7-21
Escalating a risk	7-22
Retiring or archiving a risk	7-22
How to document and report the risks	7-23
Reviewing and updating risks	7-25
Standards relating to risk assessment and risk management	7-25
Failure mode and effects analysis	7-31
Carrying out an FMEA	7-35
Strategy, structure, culture and technical support	7-38
<i>Strategy</i>	7-38
<i>Structures and systems</i>	7-39
<i>Culture</i>	7-39
<i>Technical support</i>	7-40
Acting to support the risk management processes	7-41
References	7-42

## **8 — Incident reporting and patient safety** **8-1**

Purposes	8-1
The incidence of adverse events in clinical practice in hospitals	8-1
The incidence of adverse events in primary care	8-7
Incident reporting	8-9
Types of and methods for learning about incidents	8-10
<i>Generic incidents</i>	8-10
<i>Specific events to be reported</i>	8-10
<i>Never events</i>	8-12
<i>Patient reported events</i>	8-15
Assessing current incident reporting systems	8-18
Grading of incidents	8-19
Duty of candour	8-19
Patient safety processes	8-20
Patient safety practices	8-21
Patient safety alerts	8-22
Standards relating to incident reporting and patient safety	8-26
Strategy, structure, culture and technical support	8-31
<i>Strategy</i>	8-31
<i>Structures and systems</i>	8-32
<i>Culture</i>	8-33
<i>Technical support</i>	8-34
Acting to support incident reporting and patient safety	8-35
References	8-36

<b>9 — Root cause analysis</b>	<b>9-1</b>
Purposes	9-1
Benefits of using root cause analysis	9-1
Root cause analysis terms and questions	9-2
Purpose of analysing clinical risks and incidents	9-3
Misunderstandings about RCA	9-3
Shortcomings in implementation of RCA	9-5
RCA stages	9-6
Seeking all the facts	9-7
<i>People to get information from</i>	9-7
<i>What to ask</i>	9-8
<i>How to prepare to ask</i>	9-8
<i>How to ask</i>	9-10
<i>How to talk with a patient or family member</i>	9-12
<i>Organizing the facts into a chronology</i>	9-12
Obtaining and preserving materials and information	9-13
Seeking facts and obtaining materials related to an incident	9-14
Learning the processes	9-17
Types of failures and errors	9-17
<i>Types of failures</i>	9-17
<i>Types of errors</i>	9-19
<i>Process mapping</i>	9-22
<i>Top-down process map</i>	9-24
<i>Detailed process map</i>	9-25
<i>Cross-functional process map</i>	9-27
<i>Workflow or layout process map</i>	9-27
Learning the processes related to an incident	9-32
Validating the analysis and identifying problems and root causes of breakdowns	9-38
Identifying problems	9-38
<i>Fishbone diagramming</i>	9-39
<i>Asking why five times</i>	9-42
<i>Tree diagramming</i>	9-44
<i>Contributing factors</i>	9-47
Validating root causes and contributing factors of an incident	9-48
Establishing and implementing action	9-53
<i>Confirm the safety improvement</i>	9-54
<i>Identify the types of changes</i>	9-55
<i>Mobilize opinion to get ready for change</i>	9-56
<i>Match change strategies to types of change</i>	9-57
Determining the effectiveness of actions taken	9-61
<i>Types of measures of the effectiveness of RCA actions</i>	9-61
<i>Model for measures of the effectiveness of actions</i>	9-62
Deciding on a safety improvement	9-63
Establishing an action plan and planning implementation	9-64
Determining the effectiveness of action as part of an RCA	9-66
Standards relating to investigation	9-67
Implementing root cause analysis	9-69
References	9-70

## **10 — Appraisal and continuing development of staff competence** **10-1**

Purposes	10-1
The role of appraisal and continuing development in clinical governance	10-1
Key principles of appraisal and development planning	10-2
Roles	10-3
Standards indicators or criteria for assessing performance	10-4
<i>Competences</i>	10-4
<i>Occupational standards</i>	10-5
<i>Local performance indicators</i>	10-8
Performance profile	10-9
The generic appraisal process	10-10
Pitfalls in traditional approaches to performance appraisal	10-10
Revalidation of healthcare professionals	10-11
Standards relating to staff competence	10-15
Strategy, structure, culture and technical support	10-18
<i>Strategy</i>	10-18
<i>Structures and systems</i>	10-19
<i>Culture</i>	10-20
<i>Technical support</i>	10-20
References	10-22

## **Part 3 — Supporting clinical governance working as a system** **11-1**

### **11 — Documenting clinical governance** **11-3**

Purposes	11-3
The importance of good reporting systems	11-3
Types of reports	11-5
Specifications for reports	11-5
Contents for a report on an individual clinical audit	11-6
Contents for a summary report on clinical audit	11-14
Contents for a report on a quality improvement project	11-16
Purpose and contents for a report on a root cause analysis of an incident	11-18
Approaches to reporting on governance progress	11-22
Implementation of national guidance and standards	11-23
Patient experience	11-23
High risks	11-24
Quality Accounts	11-25
Reporting on governance progress	11-27
References	11-28

### **12 — Leading clinical governance** **12-1**

Purposes	12-1
The strategy, structural, cultural and technical support issues	12-1
Evidence on leadership for quality and safety improvement	12-2

Acting on lessons from the evidence base on leading quality improvement and governance	12-13
Dissemination systems	12-15
Options for disseminating good practice	12-16
Evidence on assessing an organization's culture	12-16
<i>Clinical governance climate questionnaire</i>	12-19
<i>Competing values framework</i>	12-20
<i>Organizational culture inventory</i>	12-21
<i>Organization ideology questionnaire</i>	12-22
<i>Hospital culture questionnaire</i>	12-22
Theories on changing organizational culture	12-22
Patient safety 'culture'	12-24
The clinical governance and assurance role	12-25
Setting priorities for leadership within the clinical governance and assurance role	12-26
References	12-27
<b>13 — Selected knowledge and skills involved in clinical governance</b>	<b>13-1</b>
<b>14 — Summary of approaches and methods</b>	<b>14-1</b>
<b>15 — Glossary</b>	<b>15-1</b>
